

**Department of Electrical and Electronic Engineering  
Programme Educational Objectives (PEOs)**

The objectives of the Bachelor of Electrical and Electronic Engineering is to produce engineers who are:

<b>PEO1</b>	Knowledgeable and competent in the field of Electrical and Electronic Engineering with skills that meet the needs of industry and market
<b>PEO2</b>	Creative and innovative, as well as a caring and responsible towards society, culture and dynamic environment
<b>PEO3</b>	Able to adapt with global working environment, continuing lifelong learning, research and development in the field of Electrical and Electronic Engineering
<b>PEO4</b>	Have the knowledge and ability to solve engineering problems including the design and construction of one of the most advanced in the fields of Power Engineering, Control and Microelectronics.
