

Kejuruteraan Sistem Kawalan

Bidang pengajian ini merangkumi tajuk-tajuk dalam sistem kawalan berbilang, sistem kawalan komputer, proses simulasi dan pemodelan sistem, kawalan proses, kawalan optimum dan mantap, robotik, automasi, sistem masa nyata, sistem pakar, kejuruteraan kebolehpercayaan dan pengujian.

Control System Engineering

This field of study includes topics in multivariable control systems, computer control system, system modelling and simulation process, process control, robust and optimum control, robotics, automation, real time systems, expert systems, testing and reliability engineering.
